## How to Create a Link on iPhone Smartphones

For web-based content that you access regularly, a link that goes directly to the page can be created on your Android screen.

## Creating a Link in Safari

- 1. Open the Safari browser on your phone.
- Enter the web address you want to save. For example, keying winsupply2020.winsupplyinc.com (at right) takes you to the 2020 Strategic Planning Meetings and Vendor Showcase (SPMVS) site.
- 3. Once you are on the site, tap the **Share** icon (below).

4. Scroll right and tap Add to Home Screen.

Cancel	Add to Home Screen Add	
	SPMVS ©	$\sim$
	https://winsupply2020.winsupplyinc	
An icon wi access thi	ill be added to your home screen so you can quickly is website.	
	101	
"SPM\	/S″	
q w	ertyuiop	
a	s d f g h j k l	
<u></u>	z x c v b n m 🗷	
123	space Done	

- 5. Name the shortcut on the following screen and tap Add once you are done.
- 6. The link should now be visible as an icon on your iPhone's screen.
